First Grade Ideas and Suggestions for Science Projects

Listed below are the chapter titles that we study in first grade. Feel free to use any of these titles as an inspiration for your child's Science Project.

- Living and Nonliving Things
- Habitats
- How Plants and Animal Live
- Life Cycles
- Food Chains
- Land, Water, and Air
- Weather
- Observing Matter
- Movement and Sound
- Learning About Energy

The Science Grade for the project:

50% - - -for completing the project

20% - - -for following the guidelines

10% - - -for visual presentation of the display board

10% - - -for written report

10% - - -for student's familiarity with material during oral presentation

Please remember that this is your child's project. You can make suggestions and provide guidance, but your child needs to do the work on the project because, for the first time ever, each project will be judged. Have fun and enjoy this time with your child as they research and learn about a science topic that interests them.

**Thank you,
Mrs. Dyke**
